(54) Title: CONDUCTIVE ELEMENTS

(57) Abstract: There is disclosed a method of forming a patterned conductive element for an implantable medical device, the method comprising [the steps of (i) depositing a supplementary material (2) on a sheet of conductive, parent material (1) to form a sheet of composite material (3); (ii) applying a carrier material (4) over the supplementary material (3) of the composite sheet to form a sheet of semi-finished material (5); (iii) removing portions from at least the conductive parent material (1) of the sheet of semi-finished material (5) in accordance with a desired pattern corresponding to a patterned conductive element to be formed; and (iv) releasing at least the carrier material (4) from the sheet of semi-finished material (5).
